

End-to-End Procure-to-Pay Workflow

1. Requisition (Requesting Department)

- Staff creates a Requisition in the system.
 - Mandatory fields:
 - Item/service description
 - Quantity & estimated cost
 - Source of funding/program
 - Budget line & justification
 - Mandatory attachment:
 - Procurement Memo
 - System generates Requisition ID + QR/barcode.
 - Routed to HoD for approval.
-

2. Procurement Stage

- Procurement receives requisition + memo.
 - Conducts supplier sourcing (externally or by request for quotations).
 - Mandatory attachments uploaded:
 - Evaluation Report
 - Quotations (at least 3, where applicable)
 - Once uploaded, Procurement proceeds to PO creation.
-

3. Purchase Order (PO)

- Procurement generates a PO in the system, linked to:
 - Requisition ID
 - Supplier details
 - Funding source/program
 - Memo + Evaluation Report + Quotations
 - PO Approval Chain (sequential):
 - HoD
 - Auditor
 - Head of Finance
 - Overall Boss
 - After all approvals, PO is finalized & locked.
-

4. Goods/Services Delivery

- Supplier delivers goods/services.
 - Procurement uploads Goods Received Note (GRN) or Service
-

5. Payment Voucher (PV)

- Accounts generates Payment Voucher linked to PO.
- Auto-fills: supplier, PO number, requisition reference, funding/program.
- Required attachments:
 - Approved PO
 - Supplier invoice
 - GRN / Service completion certificate
 - Evaluation Report

- Quotations
 - Procurement Memo
 - PV Approval Chain (same as PO):
 1. HoD
 2. Auditor
 3. Head of Finance
 4. Overall Boss
-

6. Payment Execution

- Accounts executes payment via Bank/IFMIS.
 - Uploads Proof of Payment (bank advice/EFT slip).
 - System updates status = PAID.
 - Notifications sent to all parties.
-

Final Document Chain

Requisition (+ Memo) → Evaluation Report → Quotations → PO → GRN → PV → Payment Proof

This ensures:

- Memo & Requisition justify the need.
 - Evaluation Report & Quotations justify supplier choice.
 - PO commits funds with full 4-step approval.
 - PV releases funds with same 4-step approval.
 - Payment Proof closes the loop.
-
